Dear Mr. Basilone,

In light of the ongoing restrictions caused by the Covid pandemic, EPA approves the third extension request for submittal of the Draft Initial Site Review (ISR) Report for the AZP facility in Mooresboro, NC. The due date, as requested, for the Draft ISR Report will be no later than June 16, 2020.

Please let me know if you have any questions concerning this approval.

Sincerely,

John

Subject: AZP Mooresboro ISR Report
Importance: High

Dear Mr. Johnston,

I am writing to request a further extension of time to submit the draft ISR report. Phil Coop and his team have made significant progress on the ISR Report despite restrictions caused by the Covid pandemic. We are in the final stages of what will be quite an extensive and voluminous document. Similar to our former request, restrictions on travel, delays due to work being done remotely, and the large quantity of detail required have resulted in a need for more time. If you agree to an extension till June 16, 2020 we would be very appreciative.

If possible we'd like Phil and his team visit the plant again before submitting the document. Most data gathering and report development has taken place via teleconference in electronic exchange, as Phil and his team have not been at the plant since our meeting with you and others in early March. It would be good if Phil has a chance to review things at the plant one more time before the ISR Report is finalized. We're not sure if this will be possible, but more time may give us the opportunity for a trip to be made.

Thank you,
Tim
